What This Module is About

This module is all about Intersubjectivity. This is interaction between the self and the other, which is the mutual recognition of each other as persons. As humans, we have the natural and universal tendency to relate, to establish attachments and seek close relationships with other people. Our human nature drives us to reach out to other people and interact with them in meaningful ways.

In this module, it mainly focuses on accepting differences and not imposing on others, accepting others even if they are different from themselves, and the appreciation of people with disabilities and those from underprivileged. You will learn on the importance of others in one's life, given our differences and limitations; recognizing the talents and skill of others especially the underprivileged.

Lesson

1

Accepting Differences

What I Need to Know

At the end of this module, you should be able to:

1. Relate intersubjectivity as a result of influence by others.
2. Realize that accepting differences of others is vital in any human relation.
3. Appreciate that accepting people for what they are is a manifestation of care, love, respect and responsibility.

We all live in the world surrounded by different people with different background and personality. All are unique and everyone owns the right to be respected as a human being regardless of their differences.

Just what does it mean to accept yourself and others? The answer to this question is both simple and complex. Needless to say, everyone has aspects of his personality, character and physical characteristics that he would like to improve in some ways. In other words, no one is perfect.

What's In

As humans, we have the natural and universal tendency to relate, to establish attachments and seek close relationships with other people. Our human nature drives us to reach out to other people and interact with them in meaningful ways.

Exercise:

How do you usually react to new places, people or activity?

What's New

The interaction between the self and the other is related to the philosophical concept of INTERSUBJECTIVITY which is the mutual recognition of each other as persons.

A good way to think of intersubjectivity is to imagine how one relates to their family and friends. Maybe one of the family member enjoyed playing volleyball. He took one of the members of the family with him when he practiced, and he always had a good time. Growing up, he decided to join the school volleyball team. If that member of the family had not played volleyball with him growing up, he may not have grown to like the sport. The experience with volleyball can be called intersubjective because it was influenced by another person.

Exercise:

Think of a particular person who made an influence in your life and how did it change you as a person. Write your answer on the space provided below.

What Is It

Important values related to intersubjectivity include acceptance of differences and embracing diversity. We understand that each person is unique, therefore, differences will exist among groups of people. When we look at physical traits and even behavior, we can see that no two persons look and think the same. We have to accept that people have different views and beliefs. What unites us all is our shared HUMANITY and DIGNITY.

The recognition of our shared humanity and dignity is what drives us to extend assistance and act with concern towards others, especially towards individuals or groups that experience hardships and discrimination. For instance, those who are physically and mentally challenged often experience hardships because of their condition. Despite their limitations, many of them have successfully transcended their disabilities to become productive and happy individuals.

Exercise:

Who are these people? Research about his/her life and works. Write about their significant contributions in their respective fields and how these people will help you understand and accept individual differences.

GRACE PADACA _____

FATIMA SORIANO _____

RAYMOND MARTIN _____

What's More

What is your impression about the picture and statement below?

mente.co.uk

Question:

How is intersubjectivity relates with care, love, respect and responsibility?

What I Have Learned

Why do you need to accept others point of view, action or differences?

What I Can Do

Comment on the motivational quote of **Charles R. Swindoll**, "We cannot change our past. We cannot change the fact that people will act in a certain way. We cannot change the inevitable. The only thing we can do is play on the one string we have, and that is our attitude. I am convinced that life is 10% what happens to me and 90% how I react to it."

Summary

Each person is just as important as you are. This means that you learn to accept your life as worthwhile. The bottom line is, there will be things in your life that you will not be able to change and there will be things that you can. Think about it. Our character, attitude, intellect and the way in which we interact with others are all things we can change and improve.

Did you know that you can convey an attitude and acceptance to others by way in which you communicate and interact with them?

Lesson 2

Accepting Others

What I Need to Know

At the end of this module, you should be able to:

1. Understand that intersubjectivity recognizes each other as persons.
2. Realize that intersubjectivity requires accepting differences which led to good relationships.
3. Demonstrate appreciation for the talents of persons with disabilities and those from the underprivileged sectors of society.

The interaction between the self and the other is related to the philosophical concept of INTERSUBJECTIVITY which is the mutual recognition of each other as persons. As humans, we have the natural and universal tendency to relate, to establish attachments and seek close relationship with other people. Our human nature drives us to reach out to other people and interact with them in meaningful ways.

Through our interactions with others we understand how and why people think and act the way they do, thus, we notice how different we are from each other.

What's In

What makes a person different from one another? The attitude, behavior, personality and talents that humans possess are what makes every individual totally different from each other because each one is bestowed with gifts that are inherent which can be used to uplift oneself and serve others.

Exercise:

Read about the life of these persons and know their works and contributions in the community.

1. Ronnel Del Rio
2. Anna Kristina Arce

What's New

Important values related to intersubjectivity include acceptance of differences and embracing diversity. We understand that each person is unique, therefore, differences will exist among groups of people. When we look at physical traits and even behavior, we can see that no two persons look and think the same. We have to accept that people have different views and beliefs. What unites us all is our shared humanity and dignity.

The self and others are seen as a pair that shares each other's experiences. This is much like the concept of empathy or "being in the shoes" of others.

Exercise:

Look around you and list down your observations of the happenings in the society. Do people perform the same thing together? What makes people unite and understand each other? Write your answers on the space provided.

What Is It

Intersubjectivity looks at others as rooted within the self, it is safe to say that this concept also promotes a view that all people are equal. This would imply that people from other sectors of society, such as those who have physical disabilities or socio-economic challenges are seen as individuals with the same potential and talents as anybody else.

Everyone has the power to understand relationships and interactions that occur in the society with little regard to social or physical differences. In effect, people who are marginalized may still be seen as significant contributors to society through their talents, skills, and capabilities.

Exercise:

Read and understand each example of individual and answer the questions that follow.

1. Stephen Hawking is a physicist and cosmologist who, despite his rare medical condition called amyotrophic lateral sclerosis (ALS), made significant contributions to contemporary studies of relativity and quantum physics.
2. As a child, Oprah Winfrey experienced living in a poor household and was sexually abused. Despite this, she motivated herself to succeed and did so by being one of the richest women alive today.

Questions:

1. What does each situation tell us?
2. What is the situation all about?
3. What realizations can you make out of the situations?

What's More

Analyze the caricature below. Does the caricature have a relation to the concept on intersubjectivity? Yes or No? Why?

What I Have Learned

Exercise:

Complete the following unfinished sentences.

1. Intersubjectivity tells me that _____

2. When I accept the differences of others, I _____

What I Can Do

Recall and write a short narrative of a situation in your life where you had seen and made your own differences a guide in doing your best.

Summary

Intersubjectivity facilitates interaction among individuals which makes us treat each other as real persons. We are able to look at others equally, regardless of their physical and socio-economic status and make us realize that anyone can contribute to the society. With this, it promotes a sense of community and unity among individuals.

- d. Bullying

What' New

Key questions:

1. What is intersubjectivity?
2. Differentiate I-It from I-Thou relationship.
3. What is dialogue?

CONCEPT

INTERSUBJECTIVITY is a condition of man, a subject, among other men, who are also subjects. It refers to the shared awareness and understanding among persons. It is made possible by the awareness of self and the other.

A **DIALOGUE** is an interaction between persons that happens through speech or the use of words, expressions, and body language. It occurs when two persons “open up” to each other, give, and receive one another in their encounter. Genuine dialogue occurs when persons are willing to share themselves with one another. The awareness of each other's presence as a true person is defined by the acceptance of each other's uniqueness and differences.

For **Martin Buber**, an Australian-born Israeli Jewish Philosopher, human intersubjectivity is a true encounter through the three spheres of dialogue that “I” engages in. The I-THOU is the encounter between man and man where language is exchanged and is described as always mutual, real, and direct; it is an evidence of the reality of human intersubjectivity through language.

The human person is oriented toward relation and sharing in the communal life for the common good.

Intersubjectivity has significant contributions to society and relationships, including the following:

- It validates real and authentic subjective experiences.
- It facilitates interaction among individuals.
- It enables individuals to look at others equally, regardless of any physical or socio-demographic factor.
- It promotes a sense of community and unity among individuals.
- It emphasizes that anyone can contribute to society.

EXERCISE: Using the image below, write a simple conversation of former classmates who re-united after 20 years.

The concept of intersubjectivity also promotes a view that all people are equal. This would imply that people from other sectors of society, such as those who have physical disabilities or socioeconomic challenges, are seen as individuals with the same potential and talents as anybody else. Because intersubjectivity is unbiased, everyone has the power to understand relationships and interactions occurring within the society with little regard to social or physical deficiencies. In effect, people who come from marginalized situations are still seen as significant contributors to society through their talents, skills, and capabilities.

The following are some authentic examples of disadvantaged individuals who have significantly contributed to society:

1. **Stephen Hawking**

He is a physicist and cosmologist who, despite his rare medical condition called amyotrophic lateral sclerosis (ALS), made significant contributions to contemporary studies of relativity and quantum physics.

2. **Oprah Winfrey**

As a child, Oprah Winfrey experienced living in a poor household and was sexually abused. Despite this, she motivated herself to succeed and did so by being one of the richest women alive today.

How does one's relationship with fellow human beings help him understand and enrich his own humanity?

What's More

The recognition of our shared humanity and dignity is what drives us to extend assistance and act with concern towards others, especially towards individuals or groups that experience hardships and discrimination. For instance, those who are physically and mentally challenged often experience hardships because of their condition. Despite their limitations, many of them have successfully transcended their disabilities to become productive and happy individuals.

HELEN KELLER (1880-1968) was an American author, political activist, and the first deaf-blind person to earn a bachelor's degree. **NICHOLAS JAMES “NICK” VUJICIC** is an Australian evangelist and motivational speaker who was born with phocomelia, a condition in which a person is born with no arms and legs. Lastly, **ROSELLE AMBUBUYOG**. She is the first visually- impaired Filipino to graduate summa cum laude from Ateneo de Manila in 2001. Despite her handicap (loss of vision), she was a consistent honors student.

EXERCISE: Write the most extraordinary talent of the following PWDs:

1. HELEN KELLER

2. NICHOLAS JAMES "NICK" VUJICIC

3. ROSELLE AMBUBUYOG

Living in this world is not perfect. We are not perfect. The examples given were a blessing for us, for these give us inspiration to feel that we should be sensitive enough to understand every individual's differences. We sometimes feel that we are not capable of doing things but from the given examples, we can say that we should be thankful already of what we can do.

Intersubjectivity really plays significant role in each of us in understanding the differences among us.

What I Can Do

Who are these people? Choose one person whose picture shown below and research about his life and works. Write a reflection paper about their significant contributions.

What's More

Various advocacies supporting persons with disabilities have resulted in the institution of events and commemorations such as PARALYMPICS, an international sport competition modeled after the Olympics that features athletes with disabilities. The United Nations has also instituted days of awareness. Such as World Down Syndrome Day (March 21), World Autism Awareness Day (April 2), and International Day of Persons with Disabilities (December 3).

Countries around the world are encouraged to celebrate these days with activities that highlight individuals with disabilities. In many of these events, people with disabilities come together to show case their abilities and talents in talent shows, symposiums, and conventions. These events bring together “able” and “disabled” people in the spirit of friendship and cooperation.

Exercise: Based on the image below, identify the disability and the talent/ ability of the PWD.
